

Half off

The UPStation® GXT 2U is **half the size** of other on-line 3 kVA UPSs, but big on profits.

To help you boost your profits, we've developed an industry-first – a true on-line 3 kVA UPS that occupies only 2U of space. Your customers will love the space you've opened up for them, but they'll truly appreciate the reliability of the UPStation GXT 2U's on-line technology.

We've also packed internal batteries into the 2U frame – and given your customers the option to add extended battery runtime as well. Small on size but large on performance, the GXT 2U stands head and shoulders above the competition. Available from 700 VA to 3 kVA in rack mount or tower models with up to 12 minutes of built-in battery runtime. Visit our web site for complete specs on all our GXT 2U models.

Technological innovation like the GXT 2U is nothing new for Liebert. That's why Liebert was ranked #1 by VARs in "generating revenue and profit potential," according to the Annual Peripherals Excellence research conducted by VARBusiness magazine. If you're not currently a Liebert Partner, register for a Space Case (see offer at right) and we'll send you the info you need to start selling Liebert products immediately.

Free Space Case – it's the actual size of the GXT 2U so you can insert it right into your customer's rack to demonstrate space savings.

It includes product specs, marketing material, and a special GXT 2U demo offer. Register now at www.vgx2.liebert.com. This offer expires in 60 days! (Supplies are limited.)
